P/N 12930114

In-transit DC battery charger conveniently charges using the vehicle's lighter.

KEG HOOK

P/N 12930108

Holds keg in place securely.

What is a Powered Stair Climbing Hand Truck?

The Powered Stair Climbing Hand Truck is a patented, lightweight, fast, powered stair climbing hand truck for ascending or descending stairs. The Powered Stair Climbing Hand Truck is equipped with slip clutch electronic overload protection and other safety features, making it easy, safe and convenient for drivers to use during delivery. The use of the Powered Stair Climbing Hand Truck can help your company reduce injuries and workers' compensation costs and increase the productivity of your workforce.

What is the rate the Powered Stair Climbing Hand Truck can climb stairs?

The Powered Stair Climbing Hand Truck is able to climb stairs at a rate of up to 48 stairs per minute (depending on model).

What accessories are available for the Powered Stair Climbing Hand Truck?

Several noses, handles, tires and securing devices are some of the accessories available for the Powered Stair Climbing Hand Truck.

Will the Powered Stair Climbing Hand Truck be strong enough to make tough deliveries?

Yes. The Powered Stair Climbing Hand Truck is built with the same durability of all our route delivery products. In addition, the Powered Stair Climbing Hand Truck is built in a modular fashion so all the parts are replaceable.

What type of battery does the Powered Stair Climbing Hand Truck use?

The nine-pound battery for the Powered Stair Climbing Hand Truck is a sealed, maintenance free, lead-acid battery approved for air travel by DOT and IATA. Magline offers two chargers for the Powered Stair Climbing Hand Truck. An AC charger for warehouse use and a DC in-transit charger are available for convenient charging. You should only use a Magline charger for the Powered Stair Climbing Hand Truck battery.

It will take 1.5 hours to re-charge a totally discharged battery to 90 percent. If desired, you can leave the battery charging as long as necessary. It is not possible to overcharge the battery.

load. The Powered Stair Climbing Hand Truck is designed to use very little power when descending stairs. If you are able to ascend stairs, you will have enough power to descend as well. It is recommended you charge your battery after each use and avoid total discharge.

Is training required to operate the Powered Stair Climbing Hand Truck?

Magline strongly encourages companies to train and certify their employees on Powered Stair Climbing Hand Truck use. Contact your local Magline dealer for information. Training programs have been shown to significantly improve user safety. In many instances, insurance companies make policy adjustments for formal programs.

Does Magline offer a warranty on the Powered Stair Climbing Hand Truck?

The Powered Stair Climbing Hand Truck has a 12-month warranty from the date of purchase. The warranty covers defective material and production faults. The warranty on the battery is six months.

CAUTION: Before using the Powered Stair Climbing Hand Truck, users must review the entire Operator's Manual.
